AREAS OF APPLICATION

INOSENT the brand for reliable gas detection systems.

In the workplace, gas detection systems are an indispensable safety asset across a spectrum of industrial processes. Consider the routine daily use of gases in heating and refrigeration equipment in addition to the dangerous gaseous produced from processes such as, fermentation, incineration, engine combustion to name but a few. These gases can be explosive or toxic as

well as colourless, odourless and tasteless. Gases and their presence in ambient air must therefore, be accurately and professionally monitored continuously on a 24-hour basis.

INOSENT offers you intelligent, comprehensive solutions within a wide scope of industrial applications. We will support you with constructive and competent advice so that you can plan for the highest levels of safety.

COOLING SYSTEMS

Among the dangers found in refrigeration systems are flammable gases from which an explosive gas-air mixture can emerge. Also the odour-free, toxic carbon dioxide is very dangerous in high concentrations. Depending on the system, the possible dangers must be mitigated appropriately to ensure the complete safety of the system.

INOSENT RECOMMENDS THE «**EASY**» PRODUCT LINE FOR SMALL REFRIGERATION PLANTS.

Easy is a simple, high-quality, compact solution for small systems that can be easily installed by the customer. The gas detection system is delivered pre-calibrated for different refrigerants and, if required, pre-programmed for the normal alarm levels.

THE COMPACT CLASSIC FOR REFRIGERATION SYSTEMS: THE «**EASY**» PRODUCT LINE

- STANDALONE GAS DETECTORS FOR MONITORING (H)FKW, HFO, C₃H₈ AND CO₂
- LED-LIGHT WITH INTEGRATED ALARM HORN
- FLASHING LIGHT
- ALARM HORN

INOSENT has two options in its range of products that meet the requirements of a refrigeration system. The EASY product line is ideal for small refrigeration systems, while the ULTIMATE product line can give a better overview for larger, more complicated solutions.

INOSENT RECOMMENDS THE «**ULTIMATE**» PRODUCT LINE FOR LARGE REFRIGERATION PLANTS.

This comprehensive, technically sophisticated solution provides a quick, easily understandable visualisation of all events and measured data; there is an overview of the connected detectors on the integrated 7-inch screen, or a single view showing concentration levels over time. Logging of gas concentration levels, alarms and malfunctions, as well as a web server and a MODBUS output for communication with the building control system, are all integrated into the system. Other plus points: the BUS wiring of the gas detectors and LED visual alarms offers large cost savings.

THE IDEAL SOLUTION FOR COOLING SYSTEMS: THE «**ULTIMATE**» PRODUCT LINE:

- RELIABLE MONITORING OF (H)FKW, HFO, PROPANE, CARBON DIOXIDE AND AMMONIA
- «ULTIMATE» CONTROL PANEL
- GAS DETECTORS FOR MONITORING (H)FKW, HFO, C₃H₈ AND CO₂ AND NH₃; OTHER DETECTORS CAN BE CONNECTED
- LED LAMP
- FLASHING LIGHT
- ALARM HORN

STANDALONE GAS DETECTOR « EASY »

The Easy product line is as simple as it is ingenious: this stand-alone detector also has the functionality of a control device. This is a simple, high-quality, compact solution for small systems. The Easy product line can be ordered for use with most refrigerants, such as (H)FKW, HFO and Carbon Dioxide (CO₂), and can be ordered pre-calibrated for detecting other gases such as Propane (C₃H₈) oder Methane (CH₄), and programmed for the normal alarm limits.

The Easy product line offers two built-in relay contacts, an alarm horn and a flashing light. The stand-alone gas detector can be used with 230 VAC or 24 VDC and features analogue as well as digital output signals.

The Easy product line can be easily installed by the customer.

LED-WARNING SIGN WITH HORN TYPE I30 (BUS-COMPATIBLE)

The 30 cm long LED-Sign with bright red LED's may be used for most types of Gas Alarm. The LED-Sign can be used with a flashing or a continuous light and includes the option to pre-select text or pictograms in different colours, depending on the client's request. The supply voltage of the LED-Sign is 24VDC and it incorporates a 92dB Alarm horn, which can be controlled separately from the LED's.

The LED-Sign in combination with the INOSENT BUS-compatible 'Ultimate' or 'Compact' controller allows for independent programming of the LED's and sounder in different alarm modes. This design function facilitates a simple installation on the same BUS-Cable as the gas detectors, eliminating the need for additional cable. The LED-Sign is also available with 60 cm length one sided (standard) or double-sided.
